Implementation III Prevention-Related Work Plan Activities

6. Degree of Implementation. For each core requirement below (per the RCORP-Implementation Notice of Funding Opportunity), please indicate the degree to which you have implemented the associated activities and sub-activities proposed in your HRSA-approved work plan. For work plan activities that are ongoing, if the minimum threshold has been met, choose fully implemented.

	Not Yet Started	Just Beginning	Partially Implemented	Fully Implemented
P1. Public Education & Stigma Reduction. Provide culturally and linguistically appropriate education to improve family members', caregivers', and the public's understanding of evidence-based prevention, treatment, and recovery strategies for SUD/OUD, and to reduce stigma associated with the disease.		X		
P2. Naloxone Access. Increase access to naloxone within the rural service area and provide training on overdose prevention and naloxone administration to ensure that individuals likely to respond to an overdose can take the appropriate steps to reverse an overdose.		X		
P3. Drug Take-Back Programs. Implement year-round drug take-back programs.			X	
P4. Community-Based Prevention. Increase and support the use of school- and community-based prevention programs that are evidence-based to prevent misuse of opioids and other substances.				X
P5. SUD Screening and Referral. Identify and screen individuals at risk for SUD/OUD and provide or make referrals to prevention, harm reduction, early intervention, treatment, and other support services to minimize the potential for the development of SUD/OUD.				X

7. Status Relative to Timeline. For each core requirement below, please indicate your implementation status relative to the timeline proposed in your work plan.

	Delayed	On Track	Ahead of Schedule
P1. Public Education & Stigma Reduction.		X	
P2. Naloxone Access.		X	
P3. Drug Take-Back Programs.		X	
P4. Community-Based Prevention		X	
P5. SUD Screening and Referral.		X	

Implementation III Treatment-Related Work Plan Activities

8. Degree of Implementation. For each core requirement below (per the RCORP-Implementation Notice of Funding Opportunity), please indicate the degree to which you have implemented the associated activities and sub-activities proposed in your HRSA-approved work plan. For work plan activities that are ongoing, if the minimum threshold has been met, choose fully implemented.

	Not Yet Started	Just Beginning	Partially Implemented	Fully Implemented
T1. Screen for Infectious Diseases. Screen and provide, or refer to, treatment patients with SUD/OUD who have infectious complications, including HIV, viral hepatitis, and endocarditis, particularly among PWID.				X
T2. Recruit, Train, and Mentor MAT Support Staff. Recruit, train, and mentor interdisciplinary teams of SUD/OUD clinical and social service providers who are trained, certified, and willing to provide medication-assisted treatment (MAT), including both evidence-based behavioral therapy (e.g., cognitive behavioral therapy, community reinforcement approach, etc.) and FDA-approved pharmacotherapy (e.g., buprenorphine, naltrexone). This can include providing support for the required training of providers who are pursuing DATA 2000 waivers for the prescription of buprenorphine-containing products and intend to provide these medications to their patients.				X
T3. Workforce Recruitment and Development. Increase the number of providers, other health and social service professionals, and appropriate paraprofessionals who are able to identify and treat SUD/OUD by providing professional development opportunities and recruitment incentives such as, but not limited to, the NHSC.				X
T4. Address Treatment Barriers through Integrated Care. Reduce barriers to treatment, including by supporting integrated treatment and recovery, such as integration efforts between entities such as primary care service providers, behavioral health service providers, the criminal justice system, dentistry, and social services. As appropriate, provide support to pregnant women, children, and other at-risk populations using approaches that minimize stigma and other barriers to care.			X	
T5. Strengthen Collaboration to Improve Emergency Treatment. Train and strengthen collaboration with and between law enforcement and first responders to enhance their capability of responding and/or providing emergency treatment to those with SUD/OUD, particularly vulnerable populations within the service area that suffer from health access and outcome disparities.			X	
T6. Optimize Reimbursement. Train providers, administrative staff, and other relevant stakeholders to optimize reimbursement for treatment encounters through proper coding and billing across insurance types to ensure financial sustainability of services.		X		
T7. Improve Access to Treatment Supports. Enable individuals, families, and caregivers to find, access, and navigate evidence-based, affordable treatments for SUD/OUD, as well as home- and community-based services and social supports.				X

9. Status Relative to Timeline. For each core requirement below, please indicate your implementation status relative to the timeline proposed in your work plan.

	Delayed	On Track	Ahead of Schedule
T1. Screen for Infectious Diseases.			X
T2. Recruit, Train, and Mentor MAT Support Staff.			X
T3. Workforce Recruitment and Development.			X
T4. Address Treatment Barriers through Integrated Care.			X
T5. Strengthen collaboration to improve emergency treatment.		X	
T6. Optimize reimbursement.	X		
T7. Improve Access to Treatment Supports.			X

Implementation III Recovery-Related Work Plan Activities

10. Degree of Implementation. For each core requirement below (per the RCORP-Implementation Notice of Funding Opportunity), please indicate the degree to which you have implemented the associated activities and sub-activities proposed in your HRSA-approved work plan. For work plan activities that are ongoing, if the minimum threshold has been met, choose fully implemented.

	Not Yet Started	Just Beginning	Partially Implemented	Fully Implemented
R1. Improve Discharge (Re-entry) Programs and Services. Enhance discharge coordination for people leaving inpatient treatment facilities and/or the criminal justice system who require linkages to home and community-based services and social supports, including case management, housing, employment, food assistance, transportation, medical and behavioral health services, faith-based organizations, and sober/transitional living facilities with the goal of improving health care in rural areas.			X	
R2. Expand Peer Workforce. Expand peer workforce and programming as interventionists in various settings, including hospitals, emergency departments, law enforcement departments, jails, SUD/OUD treatment programs, and in the community.				X
R3. Expand Availability of Recovery Support Services. Support the development of recovery communities, recovery coaches, and recovery community organizations to expand the availability of and access to recovery support services.				X

11. Status Relative to Timeline. For each core requirement below, please indicate your implementation status relative to the timeline proposed in your work plan.

	Delayed	On Track	Ahead of Schedule
R1. Improve Discharge (Re-entry) Programs and Services.	X		
R2. Expand Peer Workforce.			X
R3. Expand Availability of Recovery Support Services.	X		

Successes, Challenges, and TA Needs

12. Capacity

	Success	Challenge	Need TA	N/A
Availability of MAT	X			
Availability of Mental Health Treatment		X		
Availability of Substance Use Disorder (SUD) Treatment		X		
Other Service Capacity (not including MAT, mental health, or SUD treatment capacity) – please specify		X		

13. Please specify which other service capacity you are referring to

Housing

14. Services

	Success	Challenge	Need TA	N/A
Care Coordination	X			
Discharge Planning	X			
Harm Reduction (other than naloxone distribution)	X			
Naloxone Distribution	X			
Prevention Services (other than harm reduction or naloxone distribution)	X

15. Operations

	Success	Challenge	Need TA	N/A
Consortium Growth and/or Engagement (including competing priorities)	X			
Billing/Coding for service reimbursement		X		
Program Financing	X			
Workforce (e.g., hiring, recruitment, retention)	X			
Telehealth/telemedicine			X	
Accessing data from consortium members for HRSA reporting	X			
Accessing data for consortium planning, monitoring consortium activities, etc.	X			

16. Other

	Success	Challenge	Need TA	N/A
Stigma/Stigma Reduction	X			
Underserved Populations Engagement (please specify population(s) below)	X			
Other (please specify)		X		

17. Please specify which population(s) you are referring to

Woman who are pregnant, nursing, have children, and are of the childbearing age population.

18. Please specify other response

Linn County Alcohol and Drug voiced the lack of support for families and friends of individuals with problematic substance use or for those that have lost someone to substance use. East Linn County still lacks the resources for family and friends support and for grief counseling specific to those who have lost someone from overdose.

19. Please describe the success(es) identified

Family Tree Relief Nursery has expanded their recovery services and now has Therapeutic Early Childhood Programs (TECP) in two locations of East Linn County. Their Nurturing Parenting classes and Parent Café groups have been well attended. The Maternal Healthcare Coordinator and Samaritan Treatment & Recovery Services Peer Support Specialist have seen increased engagement with woman who are pregnant, nursing, have children, and are of the childbearing age population. Specifically, there is increased coordination of care and wrap around services for this population which has positively resulted in more woman receiving support in the labor and delivery unit and afterward. Family Tree Relief Nursery has expanded their services for woman and children in East Linn County which includes recovery housing for woman and children. Family Tree Relief Nursery and Samaritan Treatment & Recovery Services Peer Support note the successes in having a space to meet with individuals at the recovery house which helps to reduce barriers such as transportation.

20. Please describe the challenge(s) and/or technical assistance need(s) identified

Regarding the care coordination of recovery services, partners have had trouble gaining clearance into the hospital to provide peer support to individuals. This is a challenge the Network Director is currently working on with hospital administration to create a streamline process that allows partner agencies hospital clearance. Family Tree Relief Nursery and Samaritan Treatment & Recovery Services Peer Support Specialists report challenges with client engagement once peer support services have been established and noted there is still a lack of recovery resources in certain rural communities.

Project Director Turnover

21. Did you have a change in project director during the past year?

No

SUD/Drug Concerns

22. Among the drug types listed, please rank in order the top three drug types that currently pose the greatest concern to the health and well-being of the individuals in your HRSA-designated rural service area. List in order of drugs of most concern to least concern. If you have a concern not included in this list, please use the comment box to specify.

1. Fentanyl and Fentanyl Analogs (i.e., synthetic opioids)
2. Alcohol
3. Methamphetamine

Comments

Family Tree Relief Nursery and Samaritan Treatment & Recovery Services both reported having the highest number positive screenings for alcohol use with patients. All the partners and the Medical Director of Samaritan Treatment & Recovery Services voiced how fentanyl is still the biggest concern due to the overdose rates and fact that it is showing up in various other substances. The Medical Director notes that when individuals are in treatment for methamphetamine use and given a toxicology screening, fentanyl is also present approximately twenty-five percent of the time which is often unknowingly to the individual. Between March and August of 2023 Samaritan Lebanon Community Hospital had 67 overdoses which is an increase from our last report that showed 63 overdoses between September 2022 and February 2023.

23. Among the drug types listed, please rank in order the top three drug types that your HRSA-designated rural service area has the least capacity to treat. The ranking is only for those areas that are a problem in your community (e.g., if you do not have the capacity to address cocaine but that is not a problem in your service area, do not rank it). List from top to bottom starting with the drug you have the least capacity to address. If you have a concern not included in this list, please use the comment box to specify.

1. Alcohol
2. Fentanyl and Fentanyl Analogs (i.e., synthetic opioids)
3. Benzodiazepines

Comments

All the partners were agreeable that because our service area does not have freestanding detoxification withdrawal management, individuals face significant barriers when detoxing from alcohol due to the associated risk factors. Samaritan Treatment & Recovery Services Medical Director expressed that individuals seeking treatment for alcohol use face increased barriers because they are not able to be admitted until they have successfully detoxed. Sometimes patients get lost in the process of transferring from one organization to another and loose their desperation for treatment once they are detoxed. Family Tree Relief Nursery Peer Support Supervisor stated frustration in the lack of detox centers and treatment options for individuals. He discussed the difficulties that Peer Support Specialists at Family Tree Relief Nursery face when trying to refer someone to treatment because of the amount of time they spend trying to get individuals into treatment and are often unsuccessful due to lack of availability.

SUD-Related Health Concerns

24. Among the problem areas listed, please rank in order the top three problem areas that currently pose the greatest concern to the health and well-being of the individuals in your HRSA-designated rural service area. List in order of health issue of most concern to least concern. If you have a concern not included in this list, please use the comment box to specify.

1. Fatal and Non-Fatal Overdoses (all drugs)
2. Neonatal Abstinence Syndrome
3. Drug-related Bacterial Infections (e.g., infectious endocarditis)

Comments

The Medical Director of Samaritan Treatment and Recovery Services notes that one common challenge is the lack of recovery services outside of treatment, such as recovery housing. Once an individual leaves treatment continued support with recovery is crucial. Individuals completing treatment for fentanyl or opioid use must be made aware of their tolerance returning to baseline which means they are at increased risk of overdose if they return to use. Although this reporting period Samaritan Lebanon Community Hospital had fewer babies born to NAS/NOWS, partners still feel it is of concern. The Maternal Care Coordinator expressed challenges with engagement of individuals who are pregnant and using substances with is likely a result of shame and stigma. Samaritan Treatment & Recovery Services Peer Support Specialists discussed positive experiences with care coordination between Labor and Delivery, the Maternal Care Coordinator, and Peer Supports however has trouble getting patients to follow through with recovery services.

25. Among the problem areas listed, please rank in order the top three problem areas that your HRSA-designated rural service area has the least capacity to address. The ranking is only for those areas that are a problem in your community (e.g., if you do not have the capacity to address opioid poisoning among children but that is not a problem in your service area, do not rank it). List from top to bottom starting with the health issue you have the least capacity to address. If you have a concern not included in this list, please use the comment box to specify.

1. Fatal and Non-Fatal Overdoses (all drugs)
2. Drug-related Bacterial Infections (e.g., infectious endocarditis)
3. Neonatal Abstinence Syndrome

Comments

Family Tree Relief Nursery Peer Support Supervisor notes how overdose rates continue to increase despite our ability to distribute Narcan throughout the services area which means there is greater need for services. All the partners agree that the lack of treatment facilities continues to be an issue and that there are so many individuals within East Linn County that fall through the cracks because when they are ready for treatment there is no availability, so they go back to using. Samaritan Lebanon Community Hospital saw 8 individuals under the age of 17 for overdose in this reporting period yet there are no treatment options for youth in the service area. Samaritan Treatment & Recovery Services Peer Support Specialist mentioned how the majority of woman she works with that are expecting or recently delivered, talk about the shame they carry and feeling humiliated when they have to talk about their substance use to providers. Family Tree Relief Nursery and Samaritan Treatment & Recovery services Peer Supports agreed that continuing to work on reducing stigma for expecting mothers is important.

Behavioral Health Concerns

26. Among the behavioral health services listed, please rank in order the top three services that your HRSA-designated rural service area has the least capacity to provide. List from top to bottom starting with the service you have the least capacity to provide. If you have a concern not included in this list, please use the comment box to specify.

1. Treatment for co-occurring disorders in adolescents and children
2. Crisis intervention for adolescents and children
3. Treatment for co-occurring disorders in adults

Comments

East Linn County and Linn County as a whole does not have any substance use or mental health treatment for adolescents and children. Linn County Alcohol and Drug has been providing education and prevention through their Lifeskills and Early Intervention programs to middle and high schools and during this reporting period, referred 22 youth to treatment. Often the treatment centers for youth emphasize importance around family involvement which is difficult for families when the treatment center is so far away from their hometown. Family Tree Relief Nursery Peer Supervisor believe the service area needs more Youth Outreach Specialists to provide support to youth.

Long COVID Impacts

27. Does long COVID seem to be an issue within your service area (e.g., health care providers are mentioning it, treatment protocols seem to be in development)?

Yes

28. Does long COVID impact your consortium's work addressing substance use?

No

Naloxone Availability

29. Is over-the-counter (OTC) naloxone currently available in your service area?

Yes

30. Has access to naloxone increased, decreased, or stayed the same since OTC naloxone became available?

Stayed the same

31. Within which of the following is naloxone currently available? *Select all that apply.*

- Community based organizations
- Harm reduction venues
- Health departments
- Pharmacies
- Treatment and/or recovery organizations

32. Please list any concerns or anticipated challenges you or members of your consortium have regarding the changes in naloxone availability (e.g., cost, stigma, etc.).

Samaritan Treatment and Recovery Peer Support Specialist experienced a positive response from the East Linn community at grocery stores, bars, gas stations, and salons where she distributed Narcan. Partners were in agreement that currently there is grant funding for Narcan which makes it accessible for those who need it however expressed uncertainty for what would happen when grant funding runs out.

RC-SWAY Work Plan

Overarching Goal: Reduce morbidity and mortality of substance use disorder (SUD), including opioid use disorder (OUD), in rural Linn County.

Goal 1: Strengthen and expand SUD/OUD prevention services in rural Linn County.

Objective	Activity Number	Core Activity	Activities	Improvement to health care delivery	Deliverable	Responsible persons	Timeline	Progress	Details
Develop and implement all five core prevention activities by August 31, 2024.	1a	3	Hire Project Director-Data Coordinator to support the RC-SWAY Project.	Improve coordination of services for people with SUD/OUD	Staff hired	SLCH	Q1	Completed	Jolynn Meza Wynkoop began as the PD-DC on 9/27/2021. Molly Gelinas began as the PD-DC on 9/27/2022.
	1b	3	Hire or assign Peer Support Specialists and Peer Support Group Leader to implement RC-SWAY peer support activities.	Improve access to direct services and increase SUD/OUD supports	Staff hired	STARS FTRN	Q1	In Progress	<p><u>STARS</u> Christine Felt began as the STARS PSS on 11/8/2021.</p> <p>3/1/2023 – 8/31/2023 Christine Felt left STARS on 3/21/23.</p> <p>Christina Sechrest began as the STARS PSS on 5/15/23.</p> <p>STARS PSS Position changed from a .5FTE to a 1.0 FTE</p> <p><u>FTRN</u> Amanda True began as the FTRN PSS on 12/1/2021. Jessica Collin will begin as the new FTRN PSS on 9/26/2022.</p> <p>Octavia Chandler began as the Peer Support Group Leader in 12/2021. Joshua Pankau began as the new Peer Support Group Leader on 8/4/2022.</p>

		Carter Kachel began as the new Youth Peer Outreach Worker on 7/20/2022.	Jessica Collins left her role as FTRN PSS and Lynette Cavanaugh, a Bi-lingual PSS, was hired for this position on 11/14/2023.	Vernon Rose was hired with FTRN as the Program Director on 11/28/22. He is helping ensuring deliverables are met and all necessary data is gathered for the grant.	3/1/2023-8/31/2023 Lynette Cavanaugh has been providing Bi-Lingual PSS in all Rural areas (Sweet Home and Lebanon) Youth Peer Outreach Carter Kachel has also been providing PSS services to a younger population but not limited to any specific age group.	In Progress
1c	1	FTRN, STARS, LCAD, CHCLBC, will develop and distribute culturally and linguistically appropriate education material for family members and caregivers on SUD/OUD prevention, treatment and recovery.	# of education materials developed and distributed	FTRN	Q1-Q12 STARS has shared educational materials that are currently being used among the partners 12/6/2021. STARS PSS provided Director of STARS with 50 wallet cards (25 English/25 Spanish) and 50 posters (25 English/25 Spanish) to pass out at conferences, tabeling, and trainings. Measure 110 PSS were provided 50 wallet cards (25 English/25 Spanish) and 50 posters (25 English/25 Spanish) Community Court was provided with 50 wallet cards (25 English/25
