The Coast to Cascades Community Wellness Network (CCCWN) is the consortium overseeing the work of the RC-SWAY grant. They are made up of organizations from various sectors in the community and provide direction and oversight for the project. Not all consortium members listed are responsible for activities outlined in the RC-SWAY grant work plan and there are members who provide data for the PIMS report who are not CCCWN members.

Direct Services Form Comments

Issues with Data:
 One partner organization is unable to differentiate between screening positive for opioid overuse/misuse and methamphetamine overuse/misuse. The 102 that were reported for opioid overuse/misuse could potentially include data for methamphetamine overuse/misuse.

Issues with Data:
 One of our partner organizations was only able to provide diagnosis data because they do not have access to the patient's screening data.

Issues with Data:
 One of our partners shared that their diagnosis data is larger than their patients with a positive screen data. This may be due to screenings not being recorded in the patient record.

Issues with Data:
 The referrals to support services are not related to patients with an SUD diagnosis, they are simply referrals made by either a peer support specialist or a treatment provider. The data provided are referral counts and not patient counts. All referrals are made for individuals with SUD/ODU related issues.

Issues with Data:
 One partner organization is unable to determine which patients have received MAT ONLY and which have received MAT & psychosocial combined, so all data is listed under MAT ONLY, however, the organization stated that they encourage all patients to take part in psychosocial therapy and most of the patients do.

Issues with Data:
 There may be patients who are duplicated under "Individuals who Received Recovery Support Services" due to various partners potentially reporting data on the same patient.
